At CommScope, we push the boundaries of communications technology to create the world’s most advanced networks.

We’re proud of our heritage leading the evolution of wired and wireless technology to meet the exacting demands and growing expectations of our connected society.

Through responsible corporate practices and technology innovation, we are advancing our industry while creating a more sustainable future.

Our business segments are:

**Connectivity and Cable Solutions (CCS)**
Our connector and cable solutions portfolio is one of the largest in the marketplace, encompassing network access, cable headend and passive optical network (PON) technologies for telcos/MSOs, and data center connectivity for cloud/hyperscalers. We bring gigabit broadband (cable, IPTV, OTT) to homes and businesses worldwide.

**Networking, Intelligent Cellular & Security Solutions (NICS)**
Large public venues, campuses and enterprises use our intelligent RUCKUS Wi-Fi, distributed antennas system (DAS), small cell, and private wireless solutions for licensed and unlicensed indoor coverage. Through our software, cloud, IoT and analytics capabilities, we support security applications in public and private networks.

**Outdoor Wireless Networks (OWN)**
Our complete, “everything but the radio,” end-to-end macro and outdoor small cell infrastructure portfolios include RF path components, structures, and intelligent power management solutions. Together, these technologies deliver flexible, future-ready performance and capacity for all kinds of cellular network deployments.

**Access Network Solutions (ANS)**
Our solutions enable the evolution and revolution of cable networks to high-capacity, low-latency broadband. Our diverse portfolio of solutions is ideal for partnering with cable operators for DOCSIS 3.1, distributed access architecture (DAA), PON, IP video and DOCSIS 4.0 10G deployments.

**Home Networks (HOME)**
Our solutions power the home connected experience. Our broadband and video devices and services enable service providers to deliver the best broadband, Wi-Fi, video and smart home services to millions of subscribers around the globe.

**Global Leader in Infrastructure Solutions for Communications Networks**

- **30,000+ employees/innovators**
- **50 supply chain locations**
- **16,000 patents**
- **$9.23B 2022 Sales**

**2022 | Sales by Segment**

- Connectivity & Cable Solutions: 41.1%
- Networking, Intelligent Cellular & Security Solutions: 18.4%
- Outdoor Wireless Networks: 15.9%
- Access Network Solutions: 14.4%
- Home Networks: 10.2%

**Powerful Portfolio for Networks of the Future**

We believe fiber and wireless technologies will be the essential building blocks of virtually all bandwidth-intensive networks of the future.
CommScope History

The history of CommScope is one of people and innovation. Like entrepreneurs throughout history, a young Frank Drendel took a big chance more than 40 years ago when he and business partner Jerald Leonhardt started CommScope as an independent company in 1976.

Since its founding, CommScope has innovated continuously to come up with solutions that make communication networks easier to design, simpler and faster to deploy, and more efficient to operate. The company’s culture of innovation is supported by a legacy of excellence. Our experts helped write the standards for nearly every evolution of wired and wireless network technology. CommScope, headquartered in Hickory, NC, was instrumental in the creation of:

- Cable television infrastructure
- The first wireless networks
- The first data centers
- The first intelligent buildings

We are proud to have been a substantial partner in enabling communications for 75 percent of the world’s population.

In its 40-plus years, CommScope made four transformative acquisitions that built on market opportunities and created its prominent role in the network infrastructure industry today:

- 2004 – Avaya Connectivity Solutions and the SYSTIMAX portfolio
- 2007 – Andrew Corporation
- 2015 – TE Connectivity’s Broadband Network Solutions business
- 2019 – ARRIS and Ruckus Networks

Our network technology connects people and things together - providing the lasting connections that ensure you, your business, your family, your community and society thrive in our increasingly connected world. Service providers, businesses and consumers across the globe rely on our solutions and experience. Wired, wireless, broadband, video, indoor, outdoor and anything in between, we know how. Evolving what’s now for what’s next.

We ensure our customers have great broadband and wireless, fit for the diverse places in which we live, work and play. Powering the era of connected things, edge computing and more.
