CommScope Infrastructure Academy

Future-focused, results-driven and on your side

COMMSCOPE®

Stay ahead of the curve with a partner you trust

The complexity of wireless and wired networks continues to grow. So do the expectations of your customers. They rely on your knowledge and expertise to stay productive, profitable and ahead of the game. But where do you find the time to expand your knowledge and hone your skills? CommScope.

We've spent 40+ years developing the infrastructure solutions your customers need, and working with you in the field to integrate, install and maintain them. So, when it comes to providing the training you need to stay ahead—and the flexibility your busy schedule demands—we're here for you. **Welcome to the CommScope Infrastructure Academy.**

Many of the credits earned at the academy can be applied toward certifications offered by Building Industry Consulting Service International (BICSI) and the Society of Cable Telecommunication Engineers (SCTE).
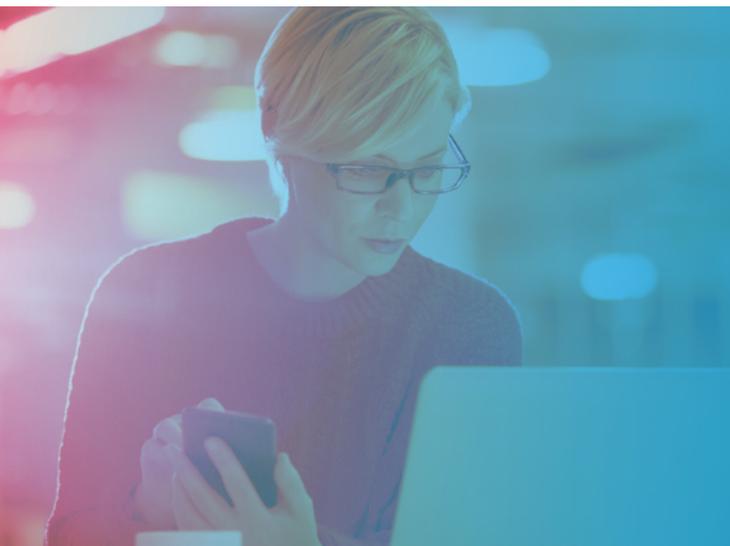

The CommScope Infrastructure Academy

The CommScope Infrastructure Academy provides in-depth training on today's advanced wireless, wireline, fiber-optic and data center solutions for installers, technicians, engineers and integrators. Offered online in multiple languages, our training takes your business to the next level without cutting into your productivity. Maximize your value—to your customers and the market—and minimize your training costs

Training designed for the way you work

Your schedule can be unpredictable. The CommScope Infrastructure Academy offers continuing education that's flexible and convenient. With nearly every course offered online, you have the freedom to learn on your own time and in the way that works best for you—laptop, tablet or smartphone. Start and stop as you need for self-paced training at home, at work or on the go. For more intensive hands-on learning, we also offer select instructor-led courses at various locations around the world.

A wide range of courses from the industry leader

Stay current on the latest technologies and best practices for today's wireless, wireline, fiber-optic and data center networks.

WIRELESS

Packed with decades of experience, our wireless courses are designed for a variety of skill levels, from senior engineers to novice installers. Topics include RF basics, antenna theory, in-building wireless engineering, and advanced distributed antenna systems (DAS). Courses on base station antennas, fiber-to-the-antenna, cell-site cabling and microwave backhaul antennas provide the latest information for today's mobile networks: 3G, 4G, 5G and beyond.

WIRELINE/FTTX

If you plan, design, install or maintain subscriber and service provider networks, our wireline, broadband and FTTx courses cover commercial and residential applications for multiple system operators (MSOs), individual cable operators and service providers. Topics include FTTx systems; outside plant fiber; trunk, distribution and drop cable; broadband fiber and coaxial deployment; installation in residential and multidwelling environments, and more.

BUILDING AND DATA CENTER

Leverage the intelligence behind CommScope's industry-leading SYSTIMAX®, NETCONNECT® and Uniprise® solutions with courses designed to improve your understanding of high-performance twisted-pair copper, fiber and automated infrastructure management solutions. Application-specific training covers enterprise network design and installation, data center deployment, intelligent building infrastructure, and security and access control systems.

Quality content to keep you current

Designed by our infrastructure experts, the CommScope Infrastructure Academy focuses on the issues shaping our industry. The breadth and depth of the training reflect our position as a trusted global advisor in the wireless, wireline and enterprise markets. Our participation on the global standards committees ensures you are equipped with the latest information and best practices available.

PartnerPRO® NETWORK

The CommScope Infrastructure Academy forms the educational foundation for our global PartnerPRO™ Network. Since its inception, the academy has provided the training that enables network members to keep their skills razor-sharp and deliver the consistent value their customers expect.

Stronger partnerships build smarter networks

Like the technology powering it, today's competitive market moves fast. To advance your skills and increase your value, work smarter. Partner with CommScope and the CommScope Infrastructure Academy.
