## Micro-core Fiber Trunks

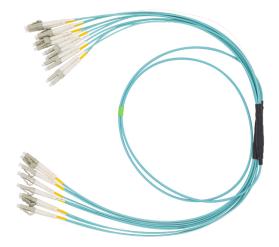

CEX Micro-core Fiber Trunks are a special solution when ducting space is of the highest concern. Using 250micron stacked fiber, excluding sub-units, it enables smaller overall diameters in the core cable. (See Sub-unitized Fiber Trunks for double-staggering and multi-fiber connectors).

## Plenum-rated (OFNP/OFCP)

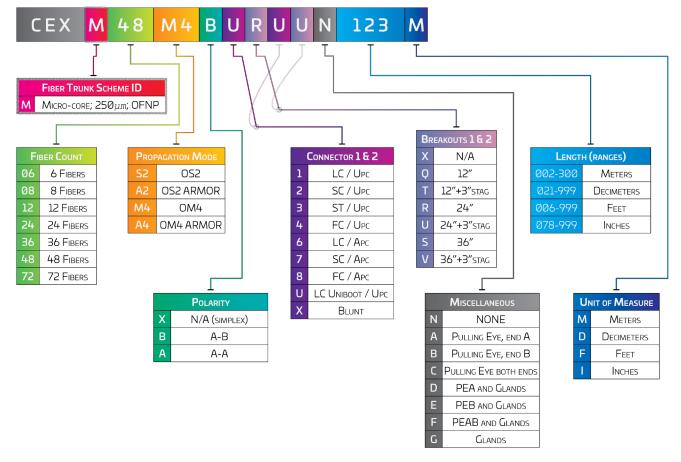

- 250micron
- Simplex and Duplex Connectors Available
- LC Uniboots of Field-Reversible Polarity

## TIA-598-C Industry Color Coding Standards

- Yellow (OS2)
- Aqua (OM4)
- Colored Breakouts Every 12 Fibers

\*\*note that `LENGTH (RANGES)` refers to overall length as measured from connector tips, excluding industry standard tolerances\*\*
