

FACT Trumpet Color Coding - FACT FRAME

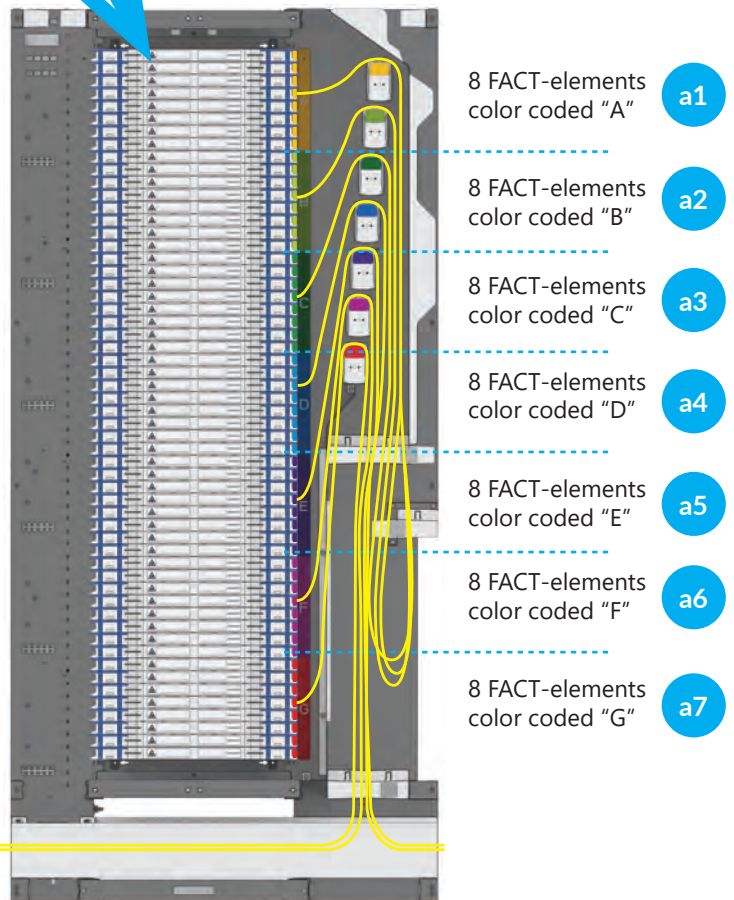

Color Code Labels: a1 to a7

For optimal jumper management and ease of installation, color code labels can be placed on the side of the FACT-trumpets. The color coding will work in combination with the FACT FRAME color label on the frame backside and on the frame drums.

1. Select the color code based on the color selection table. Color selection is defined by the mounting position in the frame.
2. Place the color code label on the side of the trumpet on the FACT- element.
3. Check correct label placement: colors on FACT trumpets should match the color coding on the frame back plate.

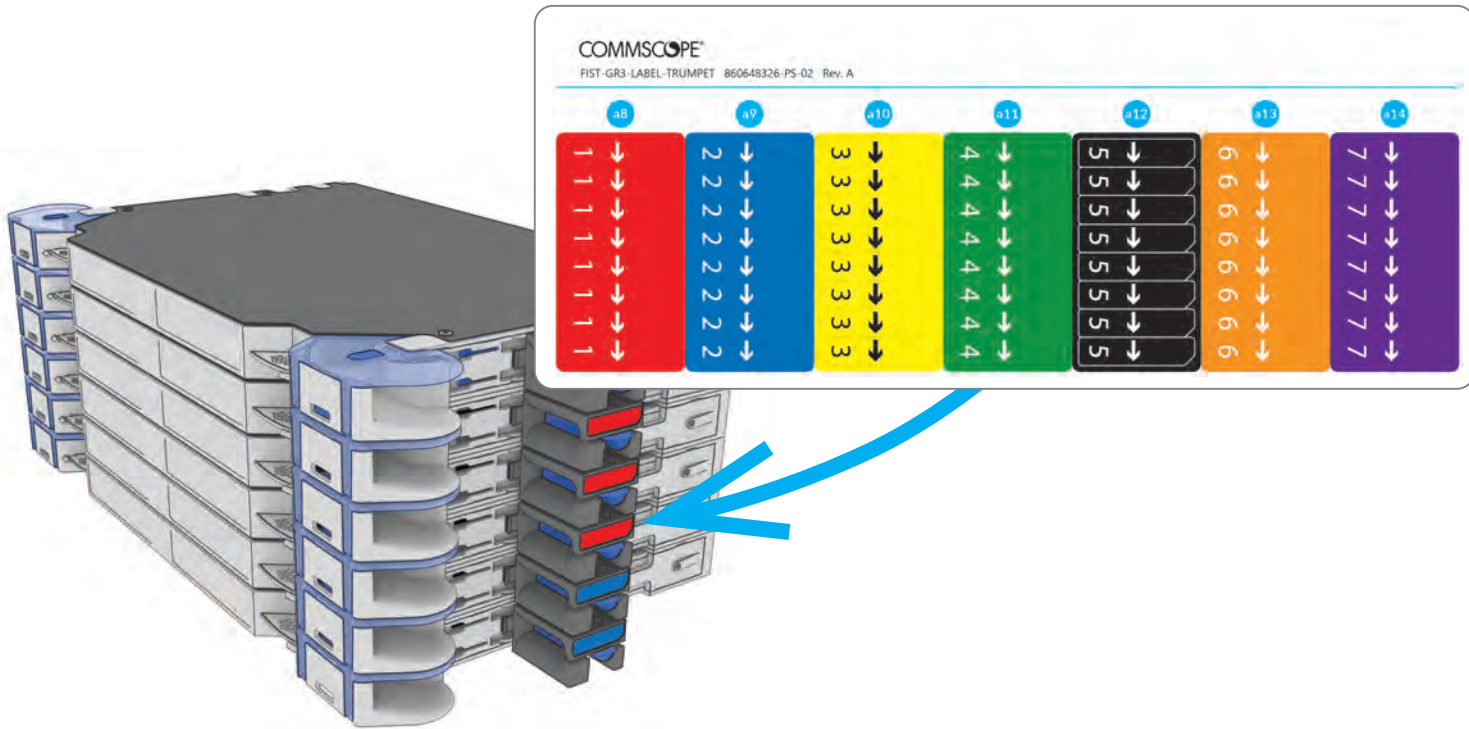

Numbering Labels: b1

Numbering labels can be placed on the frontside of FACT-elements. Location and sequence can be defined by the customer.

FACT Trumpet Color Coding - FIST GR3

Color Code Labels: a8 to a14

For optimal jumper management and ease of installation, color code labels can be placed on the side of the FACT-trumpets. The color coding will work in combination with the FIST-GR3 color label on the frame back plate and on the frame drums.

1. Select the color code based on the color selection table. Color selection is defined by the mounting position in the frame.
2. Place the color code label on the side of the trumpet on the FACT- element.
3. Check correct label placement: colors on FACT trumpets should match the color coding on the frame back plate.
