NG4 access® Cabled Modules available in all module sizes and fiber counts up to 864 fibers

NG4 cabled modules with LC and SC connectivity enable the routing of fiber cable to the frame, where multiple connectors are terminated to the frame with a single click. Cabled modules with integrated connectors ensure the cables are kept in sequential order, and help prevent accidental fiber breakage or disruption to adjacent fibers during installation.

Cabled modules are available in a pigtail version for splicing on frame or pre-terminated to 24-fiber microcable, conventional IFC cable or indoor/outdoor cable.

Cable type options:
- IFC stranded
- IFC ribbon
- Indoor/outdoor stranded
- Indoor/outdoor ribbon
- Indoor/outdoor rollable ribbon
- Microcable

Connector type options:
- LC/UPC (front/rear)
- SC/UPC (front/rear)
- LC/APC (front/rear)
- SC/APC (front/rear)
- MPO (rear)
- stub (rear)
